**GeneXpert® System  
with 10-color Technology :**

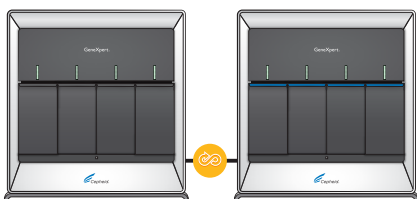

Hybrid Module Configuration  
Allows upgrading a 6-color module  
system with 10-color modules  
to run the Xpert® MTB/XDR  
test, future multiplexed tests,  
and future syndromic panels.\*

# GeneXpert II, IV, XVI Systems

with both 6-color and 10-color modules<sup>^</sup>

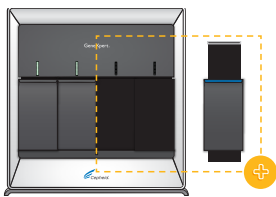

## It has never been easier to get more answers...

### 1 Daisy Chain

#### For a 6-color system at full capacity, add a 10-color instrument

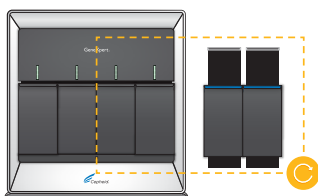

Ensure readiness for Xpert<sup>®</sup> MTB/XDR and future Xpert tests while keeping a small footprint and saving on extra computer, LIS connection, or validation.

### 2 Expand Capacity

#### For a 6-color system below capacity, add 10-color modules<sup>#</sup>

Increase system capacity to adopt the Xpert MTB/XDR Xpert test or to ensure the readiness of your system for future Xpert tests.

### 3 Convert Modules

#### For a 6-color system at or below capacity, swap 6-color modules for 2 or 4 refurbished 10-color at a preferential price<sup>#</sup>

Keep the same system capacity to adopt the Xpert MTB/XDR Xpert test or to ensure the readiness of your system for future Xpert tests.

\* Product in development. Not for use in diagnostic procedures. Not reviewed by any regulatory body. Products in development are subject to change and target menu is subject to revision.

<sup>^</sup> 10-color hybrids are not available for GeneXpert Systems R1 generation, GeneXpert Infinity systems, or GeneXpert Xpress systems or GeneXpert systems running Microsoft Windows 7 operating system.

<sup>#</sup> Not available in all countries.

CE-IVD. *In Vitro* Diagnostic Medical Device. May not be available in all countries.
