

Ready to Enroll?
Please contact your local Field Application Specialist (FAS) to enroll in the Cepheid Systems Review Program.

Enroll in the Cepheid Systems Review Program

Cepheid Systems Review Program is a customised program that empowers you with **critical, data-driven insights**, and positions you to achieve more with your GeneXpert® system. This exclusive program provides a **comprehensive analysis of the performance** of your GeneXpert system — and is only available for enrollment to select customers like you.

Your customized analysis will:

- Verify the **usage and capacity optimisation** of your system
- Monitor your **quality indicators** and patterns of testing
- Understand your **testing algorithms** and needs
- Review Cepheid **support actions** for the past year
- Propose **solutions on consolidation** and best practices for continued improvement

What you can expect is:

- Your dedicated FAS will conduct a **statistical analysis** of your GeneXpert system activity
- During an open and informative discussion, your FAS will present the findings of your **customised review and provide recommendations** to maximise your GeneXpert system's performance.
- You'll receive **project support** to ensure continued success.

During the presentation, a clear overview is given of the number of runs analysed and of the runs that did not produce a result due to technical challenges. A summary was given of what is currently on the market at Cepheid, both in terms of products and web support. In short, the presentation is an added value for the lab in several aspects.

– Sylvia de Brakeleer. ASZ Aalst Laboratorium, Belgium

This Program may not be available in all countries.
CE-IVD. *In Vitro* Diagnostic Medical Device. May not be available in all countries. Not available in the United States.
